

## MECS SHANGHAI HONORED WITH PRESTIGIOUS AWARDS FROM JIANGXI COPPER GROUP

“A+ Supplier” and “Excellent Supplier” awards are a testament to the MECS commitment to excellence

**SHANGHAI, CHINA, October 4, 2023** – MECS Chemical Plants Equipment (Shanghai) Co. Ltd. (MECS Shanghai), a subsidiary of Elessent Clean Technologies (Elessent), has been recognized with the prestigious "A+ Supplier" and "Excellent Supplier" awards by Jiangxi Copper Group Co., Ltd. (Jiangxi Copper), one of the world's largest integrated copper producers and the largest producer in Mainland China. The awards were presented during a ceremony held at the Jiangxi Copper headquarters in Nan Chang City, China where MECS Shanghai was recognized for exceptional contributions to the industry.

The "A+ Supplier" award, presented annually by Jiangxi Copper, is a testament to MECS Shanghai's unwavering commitment to excellence. Out of over one thousand qualified suppliers evaluated by Jiangxi Copper on criteria encompassing overall strength, supply quality, and business performance, MECS Shanghai emerged as part of the top 5% selected as "A+ suppliers."

In addition to the "A+ Supplier" award, MECS Shanghai also received the "Excellent Supplier" award, which is given biannually by Jiangxi Copper. This recognition is a tribute to MECS Shanghai's consistent dedication to delivering products of the highest quality, coupled with exemplary technical services. The company's outstanding performance in these areas has been acknowledged by Jiangxi Copper since 2019, reinforcing MECS Shanghai's status as a trusted partner in the industry.

"We are immensely honored to receive both the 'A+ Supplier' and 'Excellent Supplier' awards from Jiangxi Copper," stated Kanson Xue, Vice President Sales – Asia Pacific. "These accolades serve as a testament to our dedication to delivering world-class technical services and products to our customers. We extend our deepest gratitude to Jiangxi Copper for recognizing our efforts, and we look forward to further strengthening our partnership in the future."

MECS Shanghai remains dedicated to upholding the highest standards of quality, innovation, and service, and these awards serve as a testament to the company's ongoing pursuit of excellence in the industry.

The MECS<sup>®</sup> sulfuric acid technology has been in use for nearly a century in the phosphate fertilizer, non-ferrous metals (leaching & smelting), oil refining and general chemical industries. MECS<sup>®</sup> technologies feature breakthrough solutions, many of which have revolutionized the performance, quality and cost-effectiveness of customer operations. They include MECS<sup>®</sup> heat recovery systems (HRS<sup>™</sup>), MECS<sup>®</sup> SolvR<sup>®</sup> regenerative SO<sub>2</sub> scrubbing and MECS<sup>®</sup> MAX3<sup>™</sup> sulfuric acid production technology. Integrated into these MECS<sup>®</sup> technologies are proven specialty products such as catalysts, Brink<sup>®</sup> mist eliminators, DynaWave<sup>®</sup> scrubbers, ZeCor<sup>®</sup> corrosion resistant alloy products, and acid coolers all of which are specifically designed for the most demanding operating environments. Licensed and marketed by Elessent Clean Technologies, the MECS<sup>®</sup> technology is the world leading sulfuric acid production technology with more than 1,000 sulfuric acid plant licenses and projects. Elessent Technologies is committed to long-term customer satisfaction and support for the life of customer assets. Learn more at [ElessentCT.com](http://ElessentCT.com).

### About Elessent Clean Technologies

Elessent Clean Technologies is a global leader in process technologies to drive sustainability and carbon neutrality in the metal, fertilizer, chemical and oil refining industries with an unwavering commitment to customer support. We provide extensive global expertise across our portfolio of offerings in key applications – MECS<sup>®</sup> sulfuric acid production, STRATCO<sup>®</sup> alkylation, BELCO<sup>®</sup> wet scrubbing and IsoTherming<sup>®</sup> hydroprocessing. Offering critical process equipment, products, technology and services, we enable an array of industrial markets, including phosphate fertilizer, non-ferrous metals, oil refining, petrochemicals and chemicals, to minimize their environmental impact and optimize productivity. We are dedicated to helping our customers produce high-quality products used in everyday life in the safest, most environmentally-sound way possible, with a vision to make the world a better place by creating clean alternatives to traditional industrial processes.
